

Invitation

# What's the Nordic way concerning cannabis?

## Recent developments in control, policy and treatment

**Use of cannabis in the Nordic countries is either stable or increasing with some regional variation. Meanwhile some countries, mainly outside the Nordic countries, have made significant changes to their cannabis policies. What effect does the cannabis legalisation debate have in the Nordics?**

We warmly welcome you to discuss these topics at our seminar *What's the Nordic way concerning cannabis? Recent developments in control, policy and treatment* 25 April 2018. The seminar will take place at the Nordic Culture Point (conference room Ting), Kaisaniemenkatu 9, Helsinki, at 13.00-16.00.

The registration is now open: [lyyti.fi/reg/cannabis](https://lyyti.fi/reg/cannabis)

The seminar provides an excellent opportunity to network over a cup of coffee and learn more about cannabis issues in the Nordics. The main topics of the seminar are:

- The current approach in the Nordic countries regarding use of cannabis and harmful consequences
- What is the current treatment for problematic cannabis use? Which groups receive treatment and who is potentially left out?
- What are the possibilities for collaboration between the criminal justice system, the police and the treatment systems?
- Are there upcoming policy changes in the Nordics?

The seminar is arranged by the Nordic Welfare Centre's popular scientific website [popNAD.com](http://popNAD.com) and is aimed at researchers, students, policy makers, practitioners and others interested in these issues.
